

CANOPY UP!

Our World

has reached a turning point in which the very possibility of a future rests on the shoulders of us today. It is time each of us look both courageously outward at the challenge at hand *and* deep within ourselves to the purpose our Creator has attached to our lives.

Trees are living beings whose lives are crucially tied to ours. **When we fall the trees we fall our children.**

We can decrease the demand and raise awareness by seeking alternatives that promote LIFE, not death.

The answers are within you. The future is you. **We are the Ones we have been waiting for.**
